

**Bio** Karen Gunn, Improvement Support

### **Career Overview**

I qualified from Robert Gordon's University in 1997 in Adult Nursing and commenced my nursing career in what now in NHS Tayside. I have worked predominately in acute medicine in Perth Royal Infirmary. Throughout my nursing career quality and improvement has been embedded throughout and as a team we actively encouraged staff and our students to look at how we could improve care/our patient and staff experience.

I began working with the Improvement Team since 2013 and i have been involved in implementing programmes that teams have identified locally or programmes that have come from a national level. Improvement should be part of everybody's day to day life and i am dedicated to working with teams to achieve this, whether working with them on projects or co-delivering education on Improvement.
